Job category:
IT / Telekommunikation

Department:
In-Car Infrastructure

Organization:
Mercedes-Benz Tech Motion GmbH

Location:
Mercedes-Benz Tech Motion GmbH, Böblingen

Start date:
01.05.2024

Publication date:
08.04.2024

Job number:
MER00034HB

Working time:
Vollzeit (teilzeitgeeignet)

Tasks

Becoming part of Mercedes-Benz means finding the area of responsibility in which you can develop your individual talents. It means giving your best in a global automotive company that aims to build the most desirable cars in the world. You will be supported by visionary colleagues who share your pioneering spirit. Together for excellence.

Data is our DNA, technology is our passion. As data virtuosos in the Mercedes-Benz Group, we set data and technology in motion by orchestrating product data to create the ultimate digital and virtual luxury experience around Mercedes-Benz vehicles. With a pioneering spirit, expertise and passion, we turn data into data experiences and revolutionize the world of data in the vehicle - whether with the digital twin, in product data management or in virtual engineering.

Become part of our team:

We are looking for an intern (f/m/d) with a focus on C++ for our "In-Car Infrastructure" team. We work on software for series vehicles, both as an application in the vehicle and as a tool to support series development processes. The team focuses on sensor fusion, architecture for vehicle software and tool development. For example, we are significantly involved in the development of augmented reality software for the head-up and central display.

Your tasks in detail:

- Collaboration in the implementation of software in C++ in the vehicle environment
- Troubleshooting and optimization
- Carrying out tests and analyses
- Documentation of results
- Collaboration with other teams from the areas of software development, testing and quality assurance

Benefits

Qualifications

Professional requirements:

- You are a student of computer science, software engineering, electrical engineering or a comparable field of study
- You have some experience in programming with C++
- Your written and spoken English is very good

Personal skills:

- Your communication skills make it easy for you to communicate in a team
- An independent, structured and solution-oriented working is a matter of course for you
- You are capable of learning and motivated to get to the vehicle series development

Would you like to work on large innovative projects and in the digital vehicle world with us?

Then we look forward to receiving your application!

Of course, we don't do it without any formalities. Please apply online with your complete application documents (CV, certificate and cover letter). We ask for your understanding that we accept paper applications and are not entitled to return them.

We particularly welcome online applications from severely disabled people and people with equivalent disabilities. If you have any questions, you can also contact the representative for severely disabled persons at sbv-tech-motion@mercedes-benz.com, who will be happy to support you in the further application process after your application.
